ABOUT US

Established in 2008, Open Line PC provides Managed IT Services. From network Management, data storage and more. We have the pleasure of providing a wonderful range of technology products, and are partnered with local vendors for quick, reliable delivery.

Our clients are small to medium size businesses, and residential customers who are in need of a professional helping hand with services ranging from desktop support to network configuration.

We are fueled by a passion to make each customer's experience the absolute best. Personalization has been the key to our success, not only in customer interaction, but also, the technology strategies that we employ for our clients. With the experience, leadership, and dedication that are necessary to consistently deliver high quality service, we always promote a top standard work ethic in our business.

SINCE 2008
